RCM-T-100	1	0 to 16,000	10.0	1/2 - 1	4	2,419.00

Units with -T- includes a digital tachometer with sensor.

Each unit consists of the stand with vertical rod (34" high), universal open motor (non explosion proof), electrical speed controller (variable transformer), 1" square bar retort stand (model P) or 1/4" plate stand (model PC), 10" mixing shaft with bored hole and 2 set screws attachment to motor shaft, 2 high speed mini-blades (2" & 3" HSF or HSG styles).

Note that the above indicated variable speed range is at no load. When mixing in 1/2 gallon container the maximum speed is about 10,000 rpm or lower, depending on viscosity and volume of the mix. Motor is rated 10,000 rpm at full load and 16000 rpm at no load. Rated voltage is 115V. Motors with rated voltage of 220V, single phase, add \$250.00. Capacity is also affected by viscosity of the mix.

All prices are FOB Paterson, N.J. Delivery is 4 weeks from ARO.
