36	.500	698.00	735.00	810.00		

Quantity Discounts (any combination): 5 units and above 10%, 10+ units 15%.

All prices are FOB Paterson, N.J. Delivery is from stock on most units.

Boring, drilling, and keying are charged according to complexity and are quoted on request.

Standard metal is SS304. For SS316 add 40%. Polyurethane units are non sparking material.

Hard Chrome or Plasma Spray is optional on SS units. These coatings are usually applied near the edges only, where it is susceptible to wear.

Blade Holding Plates are recommended for blades 6" and larger. Plates are usually 2" to 3" smaller than blade diameter. (See price sheet for Blade Holders).

Most of the above blades may be mounted on stainless steel hubs and blade holders with set screws for easy installation on dispersing shafts. Ask the factory for prices of these items.
