

## HIGH SPEED BLADE WITH HUB ASSEMBLY

**MODEL: DBH-F10/6-2B-SS304**

### Features:

- Blade, type HSF, 8" diameter
- Disks set, blade holders, 4" diameter
- Top disk with welded hub, 1" bore
- Keyway, 1/4", 2 set screws
- Fasteners to hold bottom disk, blades and top disk with hub
- Materials: SS304

### Notes:

1. This assembly may be positioned anywhere along the mixing shaft and held in place by the 2 set screws provided.
2. The 2 high speed blade assembly mounted on mixing shaft will create a vortex that will forcibly pull down the bulk product thus emulsify and micronize it in a uniform blend while the mixing shaft is rotating at high speed with blade tip speed in excess of 5200 fpm (feet per minute).
