

**BLADE WITH HUB & BLADE HOLDERS
MODEL DBH-**

The blade is held by the top and bottom blade holder with 2 fasteners. The top blade holder (shown on the left) has a welded hub with keyway and set screws. This design is suitable for mounting a blade anywhere on the mixing shaft, most of the time it is in the middle of the mixing shaft. The blade position on the mixing shaft may be adjustable within the length of the keyway on the shaft.
