

MINI BLADES, HIGH SHEAR

MODELS HSF-01-X & HSF-H-01-X

The pictures on the left show 1" diameter blades, type HSF, high shear, in (4) four configurations.

The first unit from the left is type HSF-01-SS with a 1/4" standard center hole.

The second unit is type HSF-H-01-1/4-SS with ID .250" hub and 2 set screws.

The third unit is type HSF-H-01-5/16-SS with ID .312" hub and 2 set screws.

The fourth unit is type HSF-H-01-5/8-SS with ID .625" hub and 2 set screws.

Standard stainless type is 304. Stainless type 316 is optional and at higher prices.

These types of blades are available in these configurations with diameters ranging from 1" to 36" in standard thickness of .102" or thicknesses up to .187".

Mixing shafts in length from 10" to 15" are available with any of these blades.

Delivery is from stock on standard units. Units with options are delivered within 5 days from ARO.
