

SERIES 5060, RIBBON BLENDERS

Dantco Mixers Corporation has been designing and fabricating Ribbon Blenders for mixing and blending powders from vitamin products to building products and liquid/solids from cheese based salad dressings to candy mixes. Dantco Series 5060 Ribbon Blenders start at ½ cubic feet for laboratory use to 800 cubic feet for production processes. They are supplied with fixed and variable speed, with belt drives or electronic drives in standard or explosion proof enclosures, with single or double flight ribbons. Models with heating/cooling jackets are also available in pressures of up to 100 psig. Service repairs, overhauls, refurbishing on mechanical and electronics drive systems are also available. The picture below shows Model DRB-3.5-SS with a 2 HP motor, 60 rpm fixed speed double flight removable impeller, 3.5 cubic feet max capacity, manual 3” gate drain valve, inside finish of 240 grit.
